

AIRPORT BEACON

Site marking that can be used to quickly mark out routes and guide aircraft on taxiways.

ADVANTAGES

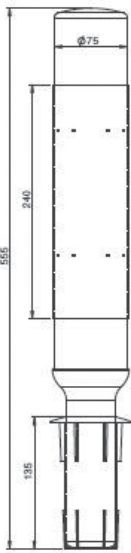

- Facilitates aircraft guidance thanks to **high retroreflectivity**: Reflexite film
- For fixed site marking of traffic lanes or as manual guidance site marking in parking areas
- **All-round visibility** thanks to the circular sleeve
- **Quick and easy to install**, with or without sleeve
- Without a connection, the airport site Beacon can be used to mark areas where there is no electricity
- Beacon compliant with International Civil Aviation Organisation (ICAO) specifications for both versions and compliant with Federal Aviation Administration (FAA) geometric specifications for the small version

TECHNICAL CHARACTERISTICS

	Small version	Large version
