SOCIAL AND ENVIRONMENTAL BENEFITS

- **CIRCULAR ECONOMY**
Use of recycled water in manufacture
75% recyclable packaging
- **WASTE REDUCTION**
Sakapo® reduces the weight of special waste by 65%
- **MADE IN FRANCE**
Made in the Normandy region

Toluene free paint for coloured marking on streets and roads. >>

ADVANTAGES

> USES

- Good **mechanical resistance** even for road traffic
- Product developed from NF certified formulations
- **Very good resistance to UV attack** providing good colour holding over time
- Great variety of colours: standard colours and production of special colours upon request

> OPERATION

- **Versatile application:** use of paint alone or with addition of anti-skid materials as per the Arum Traffic process
- User health protection: paint classified as non-harmful guaranteed toluene free and without toxic pigments
- Special Sakapo packaging for easier, less costly waste management

AXIMUM

MADE IN FRANCE

TECHNICAL CHARACTERISTICS

- Single solvent phase component acrylic paint
- Density: 1,41 kg/l
- Packaging: Sakapo® equipped 25 kg metal cans
- Colours: Light blue 5012, Signal yellow, 1003, Signal black 9004, Light ochre, Flame red 3000, Traffic red 3020, Yellow green 6018, Traffic green 6024, Sky blue 5015, Traffic yellow 1023, Traffic green 6024

Others colours (non-standards) on request (minimum order of 200 kg)

IMPLEMENTATION

- Pneumatic or airless sprayer with a stainless steel tank (60 mesh filter)
- Hydrocarbon surfaces with no dye penetration
- Apply to a clean, dry surface
- Surface temperature limits: $10^{\circ}\text{C} < T < 40^{\circ}\text{C}$
- Maximum humidity: 80 %

CONSUMPTION*

Product rate	500 to 800 g/m ²
Drying time*	5 to 10 min

* Depending on weather conditions and application rates

- Any application rate greater than 800 g/m² could lead to loss of roughness
- For high rates, anti-skid material add is recommended or follow the Arum Trafic process (please contact us)

SAFETY - STORAGE

- Flammable product for professional use
- Store in a dry, ventilated place, away from frost, sunlight or any heat source
- Conservation: 12 months from date of manufacture if original packaging unopened
- Dirty packaging, cleaning and rinsing products are forms of waste to be processed according to current regulations
- See safety data sheet available at www.quickfds.fr

DID YOU KNOW ?

Aximum Industrie has acquired a tinting machine to produce your custom solvent-based paint in small quantities (from 20 kg).

You now have the option to order Arum in the color of your choice (RAL color chart) with no minimum order and up to a maximum of 200 kg. Beyond that, the order will be processed as a non-standard Arum color.
